

The Counselor's AI Advising Toolkit

Tasks, not just jobs. Help students see, build, and earn.

THE BIG IDEA

AI is changing tasks faster than it's eliminating jobs. Help students see the tasks, build the skills, and earn the evidence.

SIX ADVISING QUESTIONS

For any advising conversation.

THE STUDENT SKILL STACK

Four parts. Build all.

01

"How might AI show up in the career field you're considering?"

02

"What tasks in that work might be supported by AI? Which still need human judgment?"

03

"What human skills will still matter — communication, ethics, judgment, creativity?"

04

"What's one piece of evidence — a project, certificate, or course — you could build this year?"

05

"What's one dual-enrollment, CTE, or college course that could move you forward right now?"

06

"How can you use AI responsibly while still doing your own thinking?"

AI literacy

Prompting. Output evaluation. Ethics.

Human skills

Communicate, judge, collaborate

Domain knowledge

The actual field

Evidence

Projects, certs, internships

PATHWAY ANCHORS

Where to send students next.

- Dual enrollment + CCAP partnerships
- College Promise programs
- Strong Workforce CTE: 74% placement
- Industry-aligned certificates
- 165K CA dual enrollees; LA/OC = 29%
- BLS: data sci +34%, cyber +29%

THE DATA

Why this matters now.

39%

of core skills change by 2030
WEF 2025

70%

of skills used in most jobs
LinkedIn 2025

56%

wage premium for AI-skilled workers
PwC 2025

86%

of Gen Z: soft skills required
Deloitte 2025

MY COMMITMENT

One thing I will try with a student in the next two weeks:
